

# fluorine

graffiti remover

**element series** consists of specialty products formulated to offer effective and safe solutions for customers' unique cleaning needs. For each solution developed another 'element' is added to the series. Providing our customers with the right solution for each task.

**Fluorine** is a unique product – it is a super concentrated, fast acting, clinging gel that can remove graffiti, stains and vandalism marks from almost any non-porous and porous surface; yet it is formulated with only safe and pleasant ingredients partnered with the EPA's Design for the Environment (DfE) Program.

## features

- As a very powerful and concentrated (90% active) formula it can be used as is for extremely difficult situations or it can be diluted as needed for a variety of applications to protect existing painted or other coated surfaces.
- As a thixotropic, viscous fluid it can be easily sprayed or brushed on surfaces yet it has an extended dwell time to penetrate and remove graffiti from all surfaces, even brick, concrete and stone.
- Diluted with water it can be used on plastic, laminate, metal, carpet and most painted surfaces, undiluted it can be used to soften and remove paint as well as all kinds of graffiti and vandalism marks from porous surfaces such as concrete and stone.
- Since it contains only EPA/DfE approved solvents it is not only environmentally friendly, it is also safe and pleasant to the user – unlike the traditional graffiti removers.

## ideal for

Graffiti and paint removal in enclosed areas such as public restrooms, buses, hallways, locker rooms and mass transportation facilities.

## optimal applications

Schools, municipalities, hotels, motels, hospitals, offices, factories and transit systems.

environmentally preferred
