

# formula 613

powdered | laundry stain remover

**linden series** combines high-performance with formulations that preserve the soft feel and fresh scent to all fabrics. High tech solutions to common spot and stain problems allow you to get the most use possible from your linens and fabrics.

**Formula 613** is a one step stain remover that can be used either to re-claim white linen in the commercial laundry wash wheel or as a pre-soak stain removing activator for difficult-to-remove stains.

## features

- A unique blend of emulsifiers, alkalis, builders, and an organic chlorine releasing agent makes it a great pre-soak stain removing activator for difficult-to-remove stains on white textiles.
- Powerful enough to be used as a stand-alone laundry re-claim formula for white linen.
- Does not reduce tensile strength of cotton, polyester and cotton/poly blends when used properly.
- Performance and rinsability unaffected by water hardness.
- Water conditioning and soil-suspending agents help rejuvenate and whiten dingy textiles.

**Note** Formula 613 is not for use on delicate fabrics such as wool and silk.

## Directions for use

As a general guide, use 2 -3 lbs. of Formula 613 for every 100 lbs. of textile. Consult your Santec technical representative for more specific use directions.

## optimal applications

Institutional laundries, health care facilities, hotels, motels and nursing homes.

## product specifications

Physical Description	White, granular powder
Fragrance	Bland
Flashpoint	N/A
pH	12.5 - 13.0
Storage Stability	1 year minimum
D.O.T. Shipping label	Corrosive Powder
