hydro destainer™

powdered | carbon destainer

linden series | clean, soft, fresh textile care

Hydro Destainer is a super concentrated powdered oxygen-based laundry destainer. Hydro Destainer may be used on all washable fabrics including colorfast goods. It is recommended for use in large industrial and institutional laundries and especially for continuous batch type washers. Hydro Destainer gives whiter whites and brighter colors while prolonging the life of textiles. Eliminating chlorine bleach from the wash formula reduces linting and reduces loss of tensile strength. Hydro Destainer stops chlorine retention and eliminates the need for Anti-color.

directions for use

Hydro Destainer is for industrial use only. It should be used in a wash formula specifically designed to meet the needs of your facility. Consult your Santec technical representative for specific use directions.

WARNING

HAZARD STATEMENTS

Risk of serious damage to eyes. Harmful if swallowed.
